

# Hutton Junior Fisheries Biology Program

## *Paid Internship Opportunity for High School Students*

*Are you a high school junior or senior?*

*Do you love science and think it's a career for you?*

*How can you get a \$4,000 scholarship for an exciting summer internship ?*

## Become a Hutton Scholar today!

### **If so, the Hutton Junior Fisheries Biology Program is for YOU!**

The Hutton Program is a summer internship program sponsored by the American Fisheries Society and is designed to introduce young people from underrepresented groups to the dynamic & rewarding world of fisheries science.

#### **What is fisheries science?**

The study of freshwater or marine aquatic systems that involve human interaction. Fisheries scientists analyze the ecological health & sustainability of aquatic systems, how the health of fisheries affect people who interact with them and vice versa.

#### **Hutton Program students:**

- Receive a \$4,000 scholarship
- Learn about the importance of healthy aquatic systems
- Participate in resource conservation & management projects with a mentor in your local area
- Gain hands-on work experience in the field and lab
- Learn about career opportunities in the field and courses of study to get there

The Hutton Program is looking for high school juniors & seniors who love science and are passionate about protecting our natural resources. Selected students are matched with a fisheries professional for an exciting, hands-on summer internship in a marine or freshwater setting. Minorities and females are strongly encouraged to apply, but any application is encouraged.

### **Student application deadline: February 28th, 2018**
