

The **Hutton Junior Fisheries Biology Program** is a paid summer internship program for high school students in the graduating classes of 2025-2026, sponsored by the American Fisheries Society (AFS). Our mission is to stimulate interest in careers in fisheries and aquatic sciences among diverse communities traditionally underrepresented in the fisheries field.

Selected students, known as Hutton Scholars, are matched and mentored by a fisheries professional for a **paid 8-week internship**. Students can expect a hands-on fisheries science experience in a marine and/or freshwater setting conducting research in laboratory and field settings.

Hutton Scholars:

- Learn about the importance of healthy aquatic systems
- Participate in resource conservation and management projects
- Gain hands-on fieldwork and research experience
- Work flexible 32 hour weeks with a fisheries professional and receive a \$3,000 stipend
- Free trip to the Hutton Scholar's Summit

Questions? Email Ashley Berniche, Education Program Coordinator, at aberniche@fisheries.org

Do you love being outdoors?
Are you interested in science?
Want a paid summer adventure?
